HIGH HOPE INT'L GROUP JIANGSU MEDICINES & HEALTH PRODUCTS IMP. & EXP. CORP. LTD.

www.mehecojs.cn

High Hope Int'l Group Jiangsu Medicines & Health Products Imp. & Exp. Corp. Ltd. (HIGH HOPE MEHECO) started the import and export trade of medical and health products in 1978, and established Jiangsu Province medical and health products import and export (Group) Company in 1984, In 2015, High Hope Int'l Group is a large state-owned listed company managed by the state owned assets supervision and Administration Commission of Jiangsu Province, was reorganized and listed as a whole (Stock Code: 600981). It is the only wholly-owned subsidiary of the group specializing in the import and export of medical products.

With a registered capital of 90 million yuan, the company is the vice president unit of China Chamber of Commerce for the import and export of medical and health products and the vice president unit of Nanjing pharmaceutical circulation industry association. It has been awarded the title of top 100 pharmaceutical enterprises in the international market for many years. It has been rated as AAA credit enterprise, and has passed the iso9001-2018 quality system certification approved by SGS of Switzerland At the same time, they hold the business license of dangerous chemicals, food business license, pesticide business license and veterinary drug business license. They have passed the general enterprise certification of the customs AEO, and the exported medical dressings, consumables and medical equipment products have iso1 3485 system certificate, and passed the EU CE certification.

Adhering to the business philosophy of "specialization, specialization and branding", after nearly 40 years of development, its business scope covers pharmaceutical raw materials and intermediates, medical dressing consumables, medical devices, Chinese and Western patent medicines, health products, plant extracts, food additives, pesticides and veterinary drugs, etc., and the export volume of many products ranks the top in China. In recent years, we have unswervingly taken the road of high-quality development, striving to achieve the strategic goal of transforming the traditional trade-oriented enterprise into the integrated service-oriented enterprise of pharmaceutical supply chain.

Products

Medical dressing consumables, medical equipment, masks, protective clothing, gloves, etc

DAKANG MEDICAL EQUIPMENT FACTORY

www.dakangyx.cn

Event Organizer

Dakang Medical Equipment Factory was founded in July 1997, and it locates in the picturesque of Wujin district, Changzhou, Jiangsu province, it covers 40000 square meters, construction area covers about 65000 square meters, it includes 20000 square meters of warehouse , and We are an enterprise specialized in the research and development and production of medical devices.We have a medical production license of class II and class III, our products include disposable dental supplies series, fetal bovine bone, disposable non-woven products, auxiliary equipment of air sterilization supply center, stainless steel products, logistics, warehousing systems, ward nursing equipment, etc.Our company has been focusing on the production of disposable oral care kits and a series of oral consumables, including disposable medical masks, surgical masks, medical protective masks, KN95 and other products since established.

Since February 2020, the virus outbreaks in China, to combat the spread of the epidemic,our factory have put into 15 full-automatic production lines of disposable medical masks, and daily production capacity is 1.5 million.Our factory has obtained certificate of CFDA medical devices of disposable medical masks and the certificate of white list (CE certification). The product has also been successfully registered in the Spanish drug regulatory department.

In April 2020, 20 fully automatic production lines of KN95 ware put into production again, with a daily production capacity of 1 million.

The products have obtained the EN149 full performance test report and GB2626 test report from Jiangsu Guojian, and got the CNAS certification and testing institution. The CE certification of Module B + C2 is now under review, and it will be issued by PRS company, the polish announcement institution, around May 20.

Our factory strictly controls the quality, and the main raw materials (melt-sprayed and non-woven) purchased by the government during the epidemic period ,which are guaranteed by Jiangyin Jinfeng and Jiangyin Bairuijia, among which the melt-sprayed is of BFE99 level.We improve products to meet customer's demand at any time, our company is in line with "strives for the survival by the credibility, to compete on quality, in good faith in cooperation, strives for the development with the strength of corporate philosophy, customer supreme purpose, products with excellent quality, reasonable price, the principle of the supremacy of service, make the company's products in the national well-known large-scale comprehensive 3 armour hospital and more than 80% of the widely used professional oral hospitals, colleges, and to establish a long-term good relations of cooperation, has won the general customers the consistent high praise,At the same time, the company's products have been successfully promoted in the overseas market and have been recognized by customers.

JIANGSU FRS ENVIRONMENTAL PROTECTION TECHNOLOGY CO., LTD.

FRS

furuishi.en.alibaba.com

Jiangsu FRS Environmental Protection Technology Co., LTD. is a national high-tech enterprise integrating the development of Internet of Things technology, air purification, disinfection equipment, research, development, production and sales of environmental monitoring equipment. We possess three scientific research subjects: FRS Technology Academy (UK), FRS Technical Development Center of Internet of Things (Hunan) and FRS Base for Scientific Research and Transformation (Shenzhen) and have obtained dozens of domestic and foreign patent technologies. FRS owns four series, such as aerobic air disinfection machine, FRS sterilizing ventilation system, FRS KN95 protective facial mask, purification project, and dozens of products, which are widely used in hospitals, laboratories, pharmaceutical workshops, schools, hotels, families, etc.

FRS-G air sterilizer has a very high filtration efficiency -- the adsorption efficiency of particles below 0.3 micron (PM2.5) can reach 99.99%. The wind resistance is only one seventh of the traditional HEPA filter screen, which greatly improves the equipment performance and can be cleaned and used repeatedly. It is through the dielectric material to form honeycomb hollow micro channel, dielectric package of electrodes in the channel and the formation of strong electric field, the motion of charged particles in the air exert enormous attraction, while only produce minimum airflow resistance to almost 100 airborne particles, adsorption of PM2.5 particles of pollutants removal effect is particularly significant, at the same time can be attached to the bacteria, microorganisms, etc on the particulate matter collected and kill in the strong electric field, so the efficient removal of PM2.5 at the same time also has the efficient antibacterial effect.

Plasma Sterilization and Dust Removal Technology is based on the principle of absorption of positive and negative charge. A strong electric field is formed through high voltage static electricity, which produces a large number of electrons and ions. The electrons and ions collide with particles and microorganisms in the air and adhere to them. Then they are adsorbed by the dust collection plate to remove particles and microorganisms and purify the air.
